

## Feature spotlight

# Adaptive due diligence

A new feature available exclusively with Business Account Opening by MANTL.

**40%**

of financial institutions rate their business account opening processes as "somewhat or very poor."

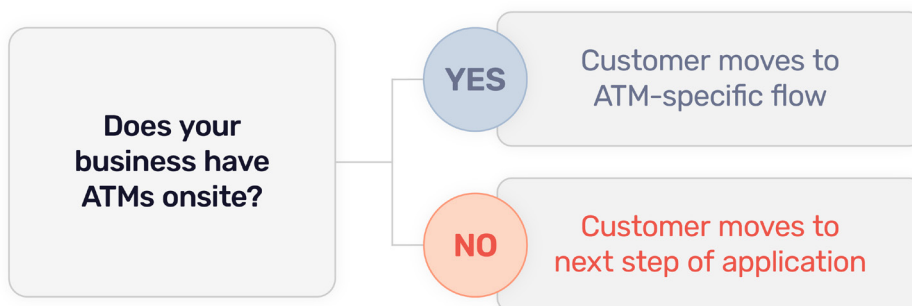

**53%**

say that legacy processes limit their ability to grow.

Source: Cornerstone Advisors

A broken process calls for a modern solution. Our risk-based approach auto-generates digital forms in accordance with your Customer Identification Program (CIP) rules and flags high-risk businesses that require enhanced due diligence (EDD). As customers answer questions, MANTL adapts their application dynamically to ask only what is needed. For example:

**Simplify document collection**

**Verify information in real time**

**Automate up to 97% of application decisions**

**Open more accounts, faster**

→ **The future of business account opening starts here.**
