

Digital Sales & Service Platform

Redefine relationship banking and how financial institutions onboard, engage, and grow relationships by unifying Account Opening, Online Banking, and Data & Marketing.

Nail the First Impression

Set the tone for long-term loyalty by giving users:

Frictionless registration:

Automatic registration and onboarding into OMB experience

Instant activation:

Immediate account access with digital card issuance

Trust based access:

Tailor access based on risk—give trusted users more options, limit access for higher-risk accounts

Unify the Experience

Deliver one consistent, trusted experience across every channel:

One UX: Deliver a neobank-like experience with a fully unified and branded user interface

One-time-entry: Eliminate duplicate data entry by syncing PII, documents, and accounts

One risk profile: Super-charge fraud prevention by closing the loop between account opening and OMB

Grow the Relationship

Turn data into action to increase product adoption and customer lifetime value:

Data-driven offers: Boost cross-sell conversion with more personalized, relevant product offers

Click to Open: Take over the entire wallet by letting customers open new accounts directly within the online banking app

Multiply ideal customers: Lower acquisition costs by creating highly qualified look-alike audiences based on existing customer data

One company, one mission

We're committed to redefining what's possible—aligning our platform, strategy, and roadmap, and investing deeply to bring this shared vision to life.

Efficient growth and deeper relationships start here
